DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: The word "An" in line 2 of claim 1 should not be capitalized. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nomura et al. (U.S. Patent No. 5,659,810).

Nomura et al. discloses a camera in column 7 line 47; an actuator is implied as connected to the gear 12a of Fig. 3; element 15 is a driven unit; element 12 is a driving member; and the two gears are 12a and 12d. As shown in Fig. 3 the gears 12a and 12d are formed at different positions in the direction of the image-taking optical axis. Thus, claim 1 is fully met by Nomura et al. The limitation of claim 2 is met because gear 12a is on the outer circumference of the driving member 12 and gear 12d is on the inside circumference. Claim 3 is met by the reference because the driven unit 15 is outside of the driving member 12.

Allowable Subject Matter

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2851

Reasons for Allowance

5. The primary reason for indication of patentability of dependent claim 4 is that the driven unit is a finder driver unit that drives a finder optical system.
